SKILLS React.js, MongoDB, Node.js, JavaScript, Express.js, HTML5, CSS3, Redux, Firebase, REST API, Context API, Tailwind CSS, Shadcn UI, Material-UI (MUI), Git , GitHub, C/C++, Java, Python, SQL

WORK EXPERIENCE

Full Stack Developer - Intern *Codelab Systems | Mangaluru*   **Jun 2024 - Aug 2024**

- Contributed to client projects by building React frontends and REST APIs with Node.js.
- Acquired practical knowledge of production-level project architectures.

Frontend Developer - Intern *RDL Technologies | Mangaluru*   **Apr 2024 - May 2024**

- Collaborated with senior developers to build React frontend components for client projects.
- Proposed a design idea that was well-received by the senior developer and led to better user experience.

PROJECTS

E - Shop (E-Commerce Web App) | *Deployed Link*   **Sep 2024 - Oct 2024**

Programmed a full-stack e-commerce website allowing users to browse products, filter by categories, add items to a cart, and complete purchases.

Technologies Used : React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Cloudinary, Stripe, Razorpay

Key Features :

- Implemented admin dashboard for product listings and orders management.
- Developed shopping cart and order management system.
- Integrated Stripe, Razorpay and COD for payment processing.

Job Junction (Job Portal Web App) | *Deployed Link*   **Aug 2024 - Sep 2024**

Engineered a full-stack job portal website that allows users to browse job listings, search for jobs, apply for positions, and provides an employer dashboard for managing job applications.

Technologies Used : React.js, Node.js, Express.js, MongoDB, Shadcn UI, Redux Toolkit, Cloudinary

Key Features :

- Designed a feature-rich dashboard that enables employers to post job openings.
- Implemented job listing displayed in a grid format with job title, location, and salary.
- Enabled users to apply for jobs and view application status in the profile page.

Live - Link (C2C Real Estate Web App) | *Deployed Link*   **Jun 2024 - Aug 2024**

Created a comprehensive real estate platform where users can register, manage profiles, list properties, perform advanced searches, and contact landlords directly.

Technologies Used : React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Firebase, Redux Toolkit, OAuth

Key Features :

- Enabled real-time broadcast chat for seamless communication between users of the application.
- Developed OTP generation for signup and password recovery for enhanced security.
- Integrated Google OAuth for easy sign-up and login using Google accounts.

EDUCATION

St Joseph Engineering College, Mangaluru   **Feb 2023 - Aug 2024**

MCA (Master of Computer Applications) - **CGPA : 8.57**

SDM Degree College, Ujire   **Jan 2020 - Sep 2022**

BCA (Bachelor of Computer Applications) - **CGPA : 7.15**
